

AIRCRAFT SPRUCE KITS

STARDUSTER TOO SA 300

The Starduster Too was built to fill a need for a reasonably sized, 2-place, open sport biplane. Stability is good and the light wing loading makes slow landing and short-field operation outstanding. The main structure of the aircraft is built of 4130 steel tubing and sheet stock and has no machined fitting or other complicated bends. The wings have spruce spars and the ribs are made of 1/4" plywood. Construction of the plane has been kept as simple as possible. The Lycoming O-360 (180 hp or 200 hp) is the best size engine for the aircraft.

Plans P/N 01-00424 **\$250.00**
Info Pack P/N 01-00596 **FREE**

ACRODUSTER TOO SA 750

This two-place biplane is about 10% smaller than the Starduster Too. It is a very strong machine designed to +/-9 G. It is a high performance machine meant for minimum of 180 and up to 360 horsepower. The roll rate is spectacular with four ailerons and symmetrical wings.

Plans P/N 01-00427 **\$125.00**
Info Pack P/N 01-00443 **FREE**

STARLET SA 500

A low-horsepower, single-place parasol, this is a fun machine. Easy to build and easy to fly, it is the best of both worlds. Engines in the 65 to 125 HP range work best. Excellent visibility and a pretty design keep your excitement high.

Plans P/N 01-00428 **\$99.50**
Info Pack P/N 01-00463 **FREE**

V-STAR SA 900

This is an exciting, single place biplane. Rated for +/-6 G, this machine will keep you smiling. With stall speed approaching 35 mph and horsepower in the 75 to 85 range, fun flying is not slowed at the gas pump.

Plans P/N 01-00429 **\$195.00**
Info Pack P/N 01-00471 **FREE**

STARDUSTER ONE SA 100

This is the single place biplane designed by Lou Stolp back in 1964 that started it all. It is a very easy aircraft to fly, powered by engines in the 125 horsepower range - A fun machine! Constructed with a 4130 steel fuselage, wood spars and ribs, and covered with fabric. The Starduster One can only be classified as "classic".

Plans P/N 01-00425 **\$115.00**
